The quality of the car is pretty good, but the road and city graphics, I'm sure you'll fall in love with these graphics if you've played many simple racing games, but I'm not so happy. Sound: The music playing in the background is really attractive, the best part is the sound of drift, the cars are great and dynamic, they are very well designed. Personally, I used to play games with headphones. Levels and stages: One thing I don't like about the game is that there are three stages/modes available to play most effectively in one big city. The sad part where there are no challenges or multiplayer modes. The latest version of the game allows you to play at the airport and off-road to make this game more interesting.
